

CyberPower®

POWERPANEL® BUSINESS 3

UPGRADE YOUR UPS EXPERIENCE

PowerPanel Business® Edition provides IT professionals with tools to shut down physical or virtual IT infrastructure during extended power outages or migrate Virtual Machines to unaffected systems. The **FREE** software easily monitors and manages CyberPower UPS systems and network connected PDUs.

SOFTWARE FEATURES:

- Automates shutdown sequence in response to power or UPS system events
- Supports physical and virtual infrastructure
- Monitors UPS vitals
- Logs events and power status recording
- Sends email notifications

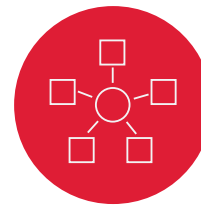

AGENT

Automates graceful shutdown of the computer connected to UPS through the USB/serial port during an unexpected extended power outage.

CLIENT

Automates the graceful shutdown of network-connected equipment in the event of an extended power outage.

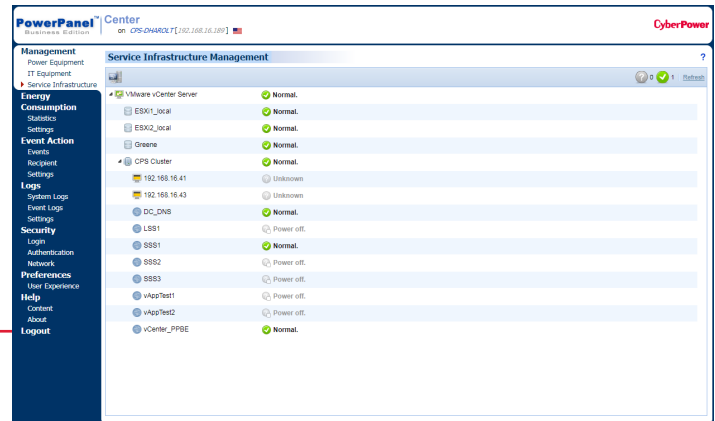

CENTER

Monitors CyberPower devices and host computers running PowerPanel® Business Edition Agent or Client software on a local network.

THE INFORMATION YOU WANT

THE INTERFACE YOU NEED

CyberPower has added support for VMware vSphere® Enterprise Edition™ to the PowerPanel® Business Edition (PPBE) platform. Used together with vCenter, PPBE provides centralized control and visibility of virtualized environments and power conditions. With an out-of-the-box, configurable automated graceful shutdown sequence or triggering vMotion, PPBE allows IT professionals to protect their virtual and physical environments from data loss or corruption.

POWER YOUR PLATFORM

PowerPanel® Business is available for the following operating systems:

PowerPanel® Business Edition WINDOWS	PowerPanel® Business Edition MAC OS	PowerPanel® Business Edition LINUX	PowerPanel® Business Edition VIRTUAL MACHINES
